Picasso is an artist, dear. Artists can paint the sky red because they know it's blue. We ordinary people must paint things the way they really are, or people might think us stupid.

Welcome...to the Wonderful World of Yearbooks

The first illustration shows the yellow which has been separated in a transparency. Next, red is added. With the addition of blue we have all the colors in the transparency. However, black is needed for richness and depth.

From living together in our music we learn brotherhood, harmony, compassion, love and the elevation of the spirit through the joys and sorrows expressed in so many different kinds of music from so many different kinds of people all over the world. If Western society can ever catch up with the message of its music we may still be saved. And if the world's generals and statesmen could all get together for a jam session or some chamber music, more good would be accomplished than wrecking young people by training them in the art of legal violence.
